Lotus Press Publishers & Distributors, 2005. Softcover. Condition: New. Agriculture is the science art and industry that is involved in the growing of plants and breeding of animals for human use. It involves all the processes like irrigation, sanitation, drainage, as well as developing newer and better varieties and breeds of both plants and animals. This exactly what is the job of the agricultural engineers, who keep developing improved and high yielding varieties as well as better fertilizers, pesticides, weedicides, and farm equipments to foster the healthy growth of plants and animals. The main idea behind creating such a dictionary is to provide the readers with a handy guide on the jargon used in the subject. It covers almost all the terms that are a part and parcel of the subject and thus meets the needs of both a students as well as someone who is already into the subject. The various examples and pictures used along with the explanation, works towards giving an enriching learning experience to the reader. Printed Pages: 264.
